Sustainable Settings COMPASS Campus Master Plan Woody Creek, Colorado

Sustainable Settings is a nonprofit organization founded by Brook and Rose LeVan under the sponsoring organization the COMPASS. Committed to demonstrating a sustainable way of life, Sustainable Settings wanted a master plan to guide the development of their site on COMPASS campus near Woody Creek. The project was sponsored by the University of Colorado and involved four semesters of collaboration between UNiT design studio and CU architecture students. The design team worked together creating a plan that included the director's house, community housing, a pottery studio, a solar green house, and constructed wetlands. The end result produced a final master plan which focused on preservation, function, and sustainability.
