**Solar Energy International Campus
Educational Facility
LEED Platinum
Paonia, Colorado**

Solar Energy International has expanded their campus for renewable resources to a new renewable energy "Eco-Campus" on 6 acres in Paonia, Colorado. This campus required a living and working concept that actively demonstrated the high tech systems featured in seminars. SEI's main educational program is the Renewable Energy Education Program (REEP). Each year hundreds of people from around the world attend hands-on workshops seeking practical experience and skills to use renewable energy resources and technologies. Classroom and laboratory work are complemented by case studies, field tours and professional installations with commercial equipment in practical applications. Instruction is provided by industry experts in the following workshops. The new educational facility demonstrates cutting edge approaches in passive and active systems, demonstrating cutting edge green building technology. This LEED Platinum building is slated for construction in 2008 – 2009 and will anchor SEI's new Eco Campus.
